

MANIFOLD SYSTEMS AND PIPING ASSEMBLIES

TURNKEY SYSTEM SOLUTIONS

CORTEC has considerable experience in the design and manufacture of complete manifold systems and piping assemblies. Across land based and offshore upstream applications, our team has supplied a wealth of custom solutions which combine the range of our valve, choke, and automation products to deliver maximum value while minimizing space, weight, and operational downtime. Our team utilizes in house engineering, design, machining, and welding, which allows greater control over the quality, design, and manufacturing ensuring a solution tailored to your needs and ready to perform on delivery.

We routinely supply our clients with manifold systems for operations including:

- API 6AV1 Rated BSDV Piping Assemblies
- Managed Pressure Drilling Operations
- Well Control Manifolds
- Production Operations
- Plug/Trash Catchers
- Drilling and Well Services
- Waterflood Systems

PIPING AND FLOWLINE ACCESSORIES API 6A PSL 1-4

CORTEC is API 6A licensed (6A-0700/Houma and 6A-1866/Port Allen) for the manufacture of a range of flowline components monogrammable from PSL 1-4 requirements. Our team can design a solution to fit virtually any common industry size, pressure class, or material requirement needed to complete your project. Utilizing CORTEC's extensive design and manufacturing expertise can optimize the fit and function of your manifold system and piping assemblies to ensure the highest levels of performance.

CORTEC's range of flowline product offerings include:

- Adapters – Studded and Flanged
- Spacer Spools
- Blast Joints
- Studded Blocks
- Compact Flanges
- Weldneck Flanges
- Buffer Tanks
- Instrument Flanges
