

WELLHEAD WING

CORTEC has been a leader in choke and valve technology development for over twenty years. Our product portfolio and domestic U.S. manufacturing uniquely position us to deliver exceptional value for your wellhead wing assembly needs. As a privately owned and vertically integrated company, CORTEC ensures that our team closely understands your operational requirements, allowing us to adapt and meet your specific demands. We are committed to continuous improvement and striving for the highest level of customer service in the industry.

LET CORTEC BE THE SINGLE SOURCE FOR YOUR COMPLETE WELLHEAD WING SOLUTION

Across adaptable, robust choke designs and reliable, high-quality valve products, CORTEC can provide not only your choke and valve needs but all specialty flowline and automation requirements. Our facilities are licensed under API 6A (Houma 0700/Port Allen 1866), and our manufacturing capabilities include Tees, Crosses, Adapters, Spacers, and Flanges. CORTEC can supply virtually any common industry flowline component, including blast joints and instrument flanges commonly used in wellhead service.

CORTEC produces a full line of compact wellhead plug catchers, which can be installed upstream of the production choke to filter debris, resulting in greater choke performance and reduced production downtime. Our automation team is versed in all common industry requirements, and CORTEC commits to a substantial stocking of actuator options, including Emerson, Rotork, and other OEM options.

CORTEC WELLHEAD WING

CHOKES

- Configurations: positive bean, needle and seat, cage and sleeve and rotary trim.
- Orifice sizes: 1/4" to 5"
- Pressure class: API 2,000 to 20,000 PSI CWP.
- NACE Compliance
- API 6A Specifications (PSL 1, 2, 3, 3G and 4).

VALVES

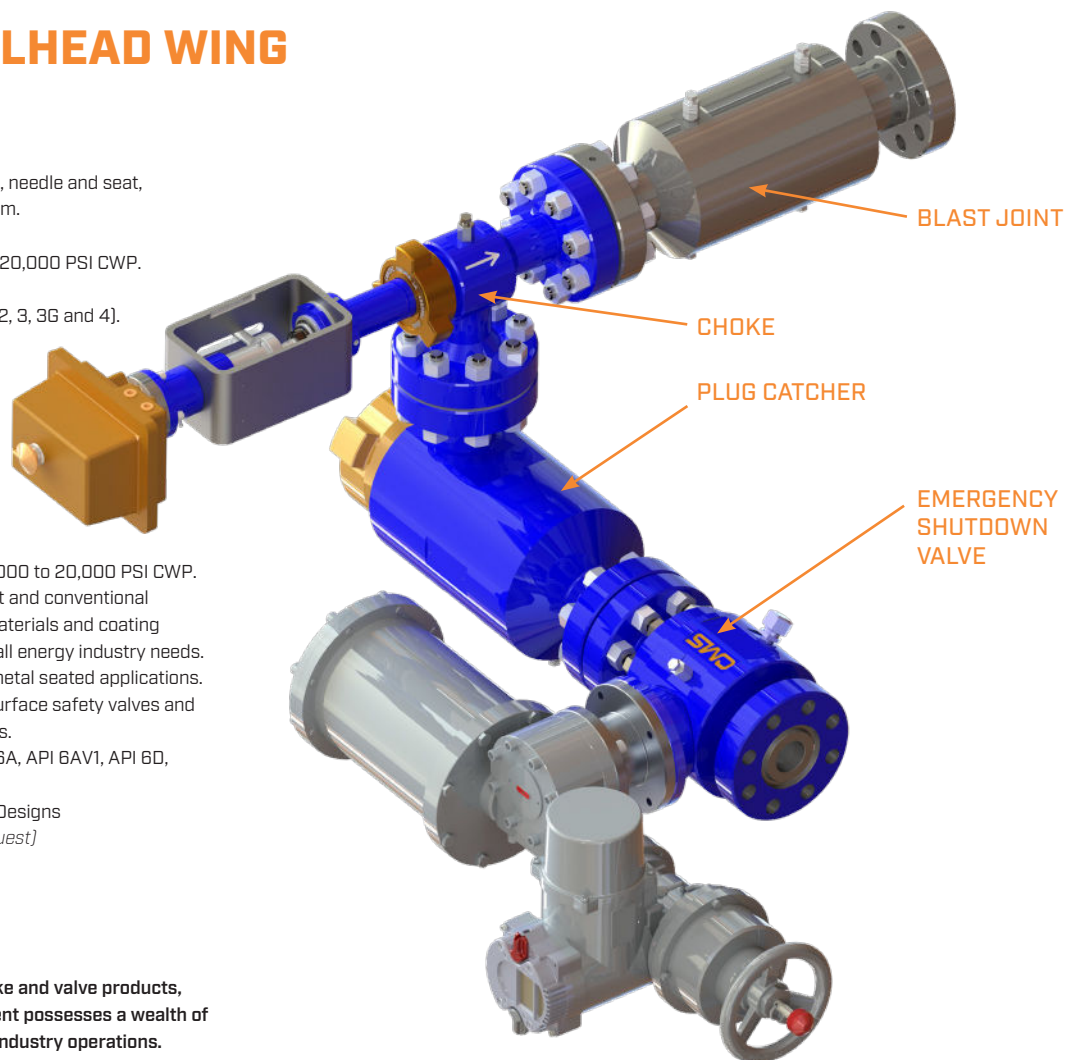

Trunnion models

- Bore sizes: 1.5" to 24"
- Pressure classes: API 2,000 to 20,000 PSI CWP.
- Available in both compact and conventional flanges in options with materials and coating options to meet virtually all energy industry needs.
- HVDF tungsten carbide metal seated applications.
- API licensed to provide surface safety valves and boarding shutdown valves.
- Industry standards: API 6A, API 6AV1, API 6D, ASME 16.34
- API 6FA/607 Fire Rated Designs
- SIL 3 (available upon request)

AUTOMATION

In addition to actuating our choke and valve products, CORTEC's automation department possesses a wealth of experience automating energy industry operations.

- Drilling, Well Service, and Production Operations.
- Choke and Valve Control Panels
- Drilling Choke setpoint Systems
- Pressure Relief Systems

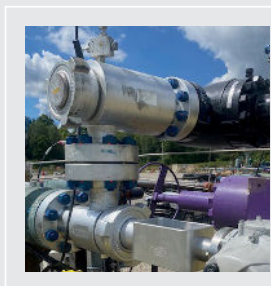

Contact CORTEC to explore how we can be your sole source for wellhead wing component requirements!

FLOWLINE COMPONENTS

CORTEC can supply a variety of flowline and piping accessories for almost any connection type in a full range of sizes, pressure classes, and materials to suit and service any application. By pairing our flowline components with our core choke and valve products CORTEC can be your one stop shop for all your wellhead wing needs!

PLUG CATCHERS

CORTEC can supply a full line of Wellhead Plug Catchers to be installed upstream of a production choke. This device will serve to minimize downtime and prolong choke trim and body life in applications where extreme solids and abrasives are present. CORTEC clients are now utilizing these field-proven devices on hundreds of shale wells offering considerable operational value. Offered in a range of flange and pressure classes from 5 to 15K, these devices can be configured to suit the needs of any common wellhead application.
